

Premier Parachute Liftbags

25kg to 50 Tonne Lifting Capacity
Open Bottom Subsea Air Lift Bags

Open End Parachute design with a single point attachment to the load bearing strap arrangement for safe subsea lifting.

A required Safety Inverter Line forces deflation in event of a dropped load.

Fabricated from tough 3 ply fabric with a load bearing polyester scrim coated on both sides with PVC for durability & UV resistance. Radio Frequency welded seams for strength and integrity.

Manufactured to IMCA D-016 Rev 4:2016
Independently tested to a safe working load ratio of 5:1

Serviced and inspected before every deployment by JW Automarine factory trained and approved technicians.

Supplied with instructions for use and certification as required.

Contact our sales team for details on sizes stocked and to find a solution for your project.

Renowned the world over, JW Automarine has led the way in subsea and surface recovery & buoyancy airbags manufacturing since 1972. Our experienced technicians use only the highest quality fabrics and materials to produce a product that can be relied upon in the harshest of environments.

JW Automarine, supplying only the best products, service and support, as you would expect from a specialist manufacturing company.
