JWA water weight load test bags are world renowned and lead the load test industry in their design, safety and efficiency.

Available from our global network of sites for off the shelf (self use) or turnkey (technician supplied) use, our dedicated teams can arrange and manage your projects and solutions globally. *Not all sizes are stocked for Rental.*

Serviced and inspected before each deployment by JW Automarine factory trained and approved technicians.

Supplied ready for use, complete with instructions for use and certification as required.

JWA load test bags are equipped with all shackles and links, a 2.5" filling hose and a 4" emptying trunk. A wide range of valves and end fittings also available, details on request.

Wireless, hand held load measurement equipment also available.

Since developing the first JWA water weight Load Test Bags to provide an environmentally friendly alternative to the use of traditional heavy solid weights, our distinctive yellow bags have now become globally accepted as the leader in this market and the professional choice around the world for load testing cranes, davits and load-bearing structures. Easily transported, swift to deploy whilst allowing a safe and controlled application of the load, JWA Load Test Bags are the proven water weight load test solution.
